## Press Information

### CAR CARE TASK INSTRUCTION

1. Using a small hand pump apply Autosmart Smart Wheel to all four wheels ensuring all areas of the rim are covered with a light spray.
2. Using second hand pump, apply Autoglym Advanced TFR all over the bodywork, leaving a short period whilst working around the vehicle to soak, with particular focus on the front of the vehicle and along the side of the vehicle behind the wheel arches
3. Using two different sponges – one for below the lower brightware and one for above, hand wash the car using a circular motion to agitate the dirt and aid the rinsing later. If you start from the top of the vehicle and then work down doing one side at a time you should not have to keep revisiting panels to clean them. The shampoo we use is Autosmart Duet and you may find it beneficial to use a wash mitt instead of the second sponge for below the brightware and wheels as it aids cleaning the wheel spokes.
4. Whilst cleaning the wheels it is an ideal opportunity to check for damage, scuffs or any bulges in the tyres.
5. Utilising a hose or high pressure washer will aid rinsing of the car and again start from the roof working your way down the body of the vehicle ensuring to hose in the wheel arches too.
6. Dry vehicle using drying towel, (using a small mangle to take excessive water from drying towels). Don't use a blade as they can easily leave surface scratches if there is any grit in the water
7. Open bonnet, boot and doors and dry shut areas
8. Hoover interior and apply Autosmart Brisk carpet cleaner to floormats. The foam withdraws dirt from the carpet, after 5 mins wipe foam away
9. Clean leather areas with Autosmart Leather Cleaner, checking for any hide damage
10. Clean chromes, fascias, and touch screens removing fingerprints and any marks with a soft cloth
11. Spray the interior of glass with Autosmart Glass Cleaner and wipe away with a soft cloth
12. Repeat for the exterior of glass, checking for stone chips and scratches
13. Check over of bodywork for scratches and dents
14. Spray bodywork with Autosmart Eclat / Stardust and wipe away
15. Dress tyres with Autosmart Highstyle using small sponge
