BENTLEY FLYING SPUR W12 S: ULTIMATE FOUR-DOOR STYLE AND POWER

- **Increased power, torque and responsiveness**
- **First four-door Bentley with top speed above 200 mph (325 km/h)**
- **Dark, sporting exterior aesthetic; unique interior styling features**

The Flying Spur W12 S is the flagship to the Flying Spur range, blending luxury, style and power.

The new model is the first four-door Bentley to have a top speed in excess of 200 mph, and offers a more sporting experience for owners looking for increased power, torque and responsiveness.

The Flying Spur W12 S features a number of dark styling cues which hint at its dynamic capabilities. A suite of black ware detailing – including Beluga gloss radiator grille and light surrounds – a rear diffuser and optional carbon fibre veneer gives the model a dramatic and purposeful appearance to match its performance.

The mighty 6.0-litre, twin-turbo W12 engine receives enhanced power and torque outputs. Through precise calibration and tuning, engine power is increased from 625 PS to 635 PS (626 bhp) and torque from 800 Nm to 820 Nm (605 lb. ft.) This increase in power means that the Flying Spur W12 S achieves a top speed of 325 km/h (202 mph) – the first four-door Bentley to exceed the 200 mph performance barrier. The initial sprint to 100 km/h is dispatched in 4.5 seconds (0-60 mph in 4.2 seconds).
