NEW FLYING SPUR S – SPORTING STYLE TO DEBUT AT GOODWOOD FESTIVAL OF SPEED

- **Flying Spur S completes Bentley's newest driving-focused family**
- **New S range to debut at Goodwood Festival of Speed**
- **Flying Spur S amplifies the most engaging Bentley four-door so far**
- **The first S model to offer a hybrid or V8 powertrain**
- **Dynamic Ride and electronic all-wheel steering standard for V8 sedan**
- **Enhanced performance acoustics**
- **Black gloss grille and brightware offers bold and purposeful exterior**
- **Dark tinted front and rear lights complement contemporary statement**
- **Unique 22" wheel design in Gloss Black and Pale Brodgar Satin**
- **Red brake calipers distinguish S models**
- **Unique interior color split with fluted S design sports seats**
- **Dinamica and leather combine comfort and tactility**
- **New S embroidery, S treadplates and fascia badging**
- **Motorsport-inspired driver display graphics**

(Crewe, June 13, 2022) Bentley is completing its new driver-focused S range with the launch of the new Flying Spur S, bringing extra dimensions of increased dynamic ability, dramatic visual presence and heightened aural drama to further enhance Bentley's pinnacle four-door sedan. This is the first time that Bentley's historic 'S' badge is applied to a Hybrid product and is another step towards Beyond100, Bentley's vision of the future and sustainable pathway forwards.

The Bentley Flying Spur is long feted for its ability to engage the driver without compromising passenger comfort. As with the recently launched Continental GT S and GT S Convertible, the new Flying Spur S models focus on

Flying Spur S: WLTP drive cycle: fuel consumption, mpg (l/100km) – Combined 22.2 (12.7). Combined CO₂ – 463g/mi (288g/km).

Press Information

the pleasure of driving – but with the added choice between 4.0-liter V8 or V6 Hybrid powertrains.

Bentley customers now have a clear choice, with the comfort-oriented Flying Spur Azure emphasizing 'Wellbeing behind the Wheel', or the new Flying Spur S models expanding the visual, tactile and aural enhancements to the driving experience.

Two Routes to Exhilaration

The Flying Spur S is offered with a choice of two powertrains, each delivering a sporting and rewarding driving experience via complementary engineering approaches, retaining the effortless performance for which Bentley is synonymous.

The V8 version of the Flying Spur S is powered by Bentley's advanced 4.0-liter V8 engine, developing 542 bhp (550 PS) and 568 lb.ft (770 Nm) of torque. The 0-60 mph benchmark takes a mere 4.0 seconds and top speed – where possible and legal – is 198 mph. It comes as standard with Bentley Dynamic Ride, capable of applying up to 959 lb.ft (1300 Nm) of anti-roll torque in 0.3 seconds to keep the body flat and stable under spirited cornering, while delivering a smooth and supple ride for passengers at gentler velocities by decoupling the wheels across each axle. Electronic All-wheel Steering is also included as standard. During low-speed maneuvers, the system turns the rear wheels in the opposite direction to the fronts by up to 4.2° to reduce the turning circle and increase agility. At higher speeds the rear wheels turn in the same direction as the fronts for confidence-inducing stability during lane changes and overtakes.

Press Information

For those who are city-based or environmentally-focused, the Flying Spur S is also available with a hybrid powertrain. This combines a 2.9-liter V6 gasoline engine with an advanced electric motor, delivering a total of 536 bhp (544 PS) and 553 lb.ft. (750 Nm) of torque, for a 0-60 mph time a mere one tenth of a second slower than the V8 at 4.1s. Capable of up to 26 miles (41 km) in pure electric drive, and with just 120g of CO₂ per mile (75g of CO₂ per kilometer) (WLTP) the Flying Spur Hybrid S is jointly the most efficient Bentley yet.

Customers who enjoy exploring their Bentleys' performance also appreciate the aural pleasure of a performance-focused powertrain; the V8-powered Flying Spur S delivers this via a redesigned sports exhaust while the Flying Spur Hybrid S (whilst in Sport mode) features ingenious sound enhancements in the engine bay that match the more sporting character of the car for the driver while maintaining low sound levels in the rear cabin.

Exterior Design – Purposeful Yet Understated

The black brightware of the Flying Spur S models creates an athletic and understated look, whatever the chosen exterior finish. As Crewe's design team clearly understands, the absence of bright polished metal highlights encourages the eye to take in the vehicle's form and perceive it as lower and wider – the essence of a sporting Bentley. The effect is complemented by gloss black lower bumper grilles, dark tinted headlamps and rear lights, black quad tailpipe finishers and distinctive S badging on the front fenders. The grille is black gloss with vertical vanes and black gloss surround. Only the winged Bentley badge and lettering on the bootlid stand out with their bright chrome finish.

The S range is offered with an all-new 22" wheel option, with five Y-shaped spokes in gloss black or alternatively available in a new Pale Brodgar Satin finish.

Flying Spur S: WLTP drive cycle: fuel consumption, mpg (l/100km) – Combined 22.2 (12.7). Combined CO₂ – 463g/mi (288g/km).

Press Information

A second wheel option for the S models is a 21" tri-spoke wheel design that combines gloss black and bright machined finishes – also unique to S. Whatever the wheel, standard-fit red brake calipers highlight the extrovert character of the S models.

Interior – Visual and Tactile Cues

For the interior of the Flying Spur S, customers can let their imaginations roam with a choice of performance-focused two-tone color splits, handcrafted in Crewe's leather shop using a combination of smooth hide and soft-napped Dinamica. This suede-like material is used for the heated steering wheel, gear lever, seat cushions and seat backrests while leather hide is employed on the seat bolsters, door pads, along the instrument panel and around the console.

The S design seats are fluted, with quilting available as an option, and the 'S' emblem is embroidered on the headrest of each seat; embroidered Bentley wings are a no-cost alternative. Driver instrumentation takes its inspiration from motorsport chronometers, with the same graphics as the Continental GT Speed. Finishing touches include a metal S signature badge on the fascia and illuminated Bentley treadplates with the 'S' device replacing the Bentley Motors Ltd plaque.

A Celebration at Goodwood

The new S model range will make its dynamic debut at the upcoming Goodwood Festival of Speed, running from Thursday, June 23rd to Sunday, June 26th. Examples of the Flying Spur S, GT S and GTC S will take to the famous Hillclimb as part of the First Glance class, and be on display in the paddock throughout the event. They will be joined by a suite of other Bentleys from past

Flying Spur S: WLTP drive cycle: fuel consumption, mpg (l/100km) – Combined 22.2 (12.7). Combined CO₂ – 463g/mi (288g/km).

and present, including iconic racecars and a dedicated parade of models to celebrate 40 years of turbocharged Bentleys – with the new S range as the latest members of the lineage.

- ENDS -

Notes to editors

Bentley Motors is the most sought-after luxury car brand in the world. The company's headquarters in Crewe is home to all of its operations including design, R&D, engineering, Mulliner and production of the company's five model lines, Continental GT, Continental GT Convertible, Flying Spur, Bentayga and Bentayga EWB. The combination of fine craftsmanship, using skills that have been handed down through generations, alongside engineering expertise and cutting-edge technology is unique to UK luxury car brands such as Bentley. It is also an example of high-value British manufacturing at its best. Bentley employs around 4,000 people at Crewe.
