NEW BENTAYGA IN DETAIL: FOUR SEAT COMFORT SPECIFICATION

- **Four-seat version of new Bentayga provides ultimate luxury SUV rear cabin space for two occupants**
- **Building on the success of first generation Bentayga with 20% - 4,000 cars - including the Four Seat Comfort Specification**
- **Up to 100mm more rear leg room over previous generation**
- **Rear seat feature content provides luxury for all occupants**
- **Additional stowage and charge sockets located in rear centre console**
- **Exquisitely finished quilted back board with handcrafted detailing**

(Crewe, 16 July 2020) The new Bentayga has the greatest breadth of ability of any car on the road, and with the Four Seat Comfort Specification, the Bentayga's abilities as the limousine of SUVs comes to the fore. With the four-seat version of the car now available from launch along with both a five-seat configuration and the option of a full seven-seat interior, the interior of the new Bentayga is configurable to the demands of any family.

Building on the success of the previous generation where one in every five cars (4,000 vehicles) was specified with the four-seat configuration, rear legroom has been improved to enhance the chauffeur-driven experience through careful design and relocation of the backboard separating the cabin from the boot area. The maximum recline of the rear seats has been increased from 32° to 40°, and the fore and aft travel has been increased by 35mm. This combination delivers a 100mm improvement in knee room in the reclined position, helping to make luxury travel even more comfortable.

[Bentayga WLTP drive cycle: fuel consumption, mpg (l/100km) – Combined 21.1 (13.3). Combined CO₂ – 302g/km.]

Press Information

All the seats in the new Bentayga have been completely redesigned and now have a more sculptured shape, particularly around the shoulder area, to provide an even greater level of comfort that further improves on the industry-recognised benchmark for seat comfort.

The Four Seat Comfort Specification also adds further rear seat content including seat ventilation (in addition to seat heating as standard), a selection of six different massage programmes, and a winged comfort headrest. With the Four Seat Comfort Specification the Mulliner Console Bottle Cooler can also be chosen, housing a fully integrated drinks cooler for a 750ml bottle, and two handcrafted Cumbria Crystal Flutes.

Between the two rear seats, a rear centre console provides additional stowage and two further USB charging sockets. While a beautiful leather trimmed backboard containing a diamond quilted ski hatch, separates the cabin from the boot space.

To access the additional seat functionality, rear seat passengers benefit from a technology upgrade for the new Bentayga with the new, larger Touch Screen Remote control tablet, similar to that introduced in the all-new Flying Spur. The five-inch display uses more contemporary graphics and has extra processing power through an onboard quad-core processor and 1 GB of RAM. The unit can control a range of functions, from rear seat heating and massage, to the media system and navigation, to mood lighting, and electric windows and sunroof blind.

Notes to editors

Bentley Motors is the most sought after luxury car brand in the world. The company's headquarters in Crewe is home to all of its operations including design, R&D, engineering and production of the company's three model lines, Continental, Flying Spur and Bentayga. The combination of fine craftsmanship, using skills that have been handed down through generations, alongside engineering expertise and cutting-edge technology is unique to UK luxury car brands such as Bentley. It is also an example of high-value British manufacturing at its best. Bentley employs around 4,000 people at Crewe.
