### **BENTLEY UNVEILS THE FLYING SPUR HYBRID FOR THE FIRST TIME IN EUROPE AT AUTOWORLD**

- **The new Bentley Flying Spur Hybrid to make its first European public appearance at the 2022 Autoworld Museum Brussels**
- **The exhibition hosts a number of exceptional Bentley vehicles including the Flying Spur Hybrid, Flying Spur V8 and the Continental GT Convertible Speed**
- **Autoworld marks a perfect venue to display Bentleys unrivalled mix of craftsmanship, technology and design**

**(Munich, 14 January 2022)** Bentley Motors made its European debut of the latest addition to the Flying Spur family in Belgium at the 2022 Autoworld Museum. The Bentley Flying Spur Hybrid marks an important model for Belgium and Europe where demand for electrified products have been exceptionally strong during 2021.

The introduction of the new Flying Spur Hybrid is the brand's first electrified sedan and the most environmentally friendly Bentley to date. The vehicle offers a seamless merger between the internal combustion engine and electric motor, enabling progressive serenity regardless of the driving characteristics demanded by the driver.

The new powertrain combines a 2.9-litre V6 petrol engine with an advanced electric motor, delivering a total of 544 PS (536 bhp) and 750 Nm (553 lb.ft) of torque - an additional 95 PS in comparison to the Bentayga Hybrid. The new Flying Spur becomes the most efficient Bentley ever, having the capability to cover over 700 km when fully fuelled.

Flying Spur Hybrid is available to order in most markets, but is currently not available in EU27, UK, Switzerland, Israel, Ukraine, Norway, Turkey and Vietnam.

## Press Information

Over 40 exceptional cars from the history of the automotive industry accompanied the Flying Spur Hybrid at the Autoworld venue. Among these were the Flying Spur V8, the Continental GT Speed Convertible and the Bentley Continental GT3-R. The selection of Bentley models on display showcases the strongest product portfolio in the history of the brand whilst cementing the role of Bentley in automotive history.

Making the European public reveal of the Flying Spur Hybrid and having already introduced the Bentayga Hybrid marks an important step in the Beyond100 strategy. This strategy has Bentley set on becoming a fully end-to-end carbon neutral brand by 2030. On its journey, it will see the entire Bentley range having an electrified drivetrain option by 2024 and the brand's first BEV in 2025.

Balazs Rooz, Regional Director, Europe commented: "We are very much looking forward to engaging with Belgian customers and fans of the Bentley brand at Autoworld. With the recent announcement of our strong performance across Europe, supported by a double digit increase result, 2022 will be another busy year with the brand activities ahead of us. While the Flying Spur Hybrid will reach our customers from April onwards, we are excited to hear the feedback from this first public appearance in Europe."

For more information on the models on offer in the Bentley range, please visit the Bentley Media site: <https://www.bentleymedia.com/>

## Press Information

### **Notes to editors**

Bentley Motors is the most sought-after luxury car brand in the world. The company's headquarters in Crewe is home to all of its operations including design, R&D, engineering, Mulliner and production of the company's three model lines, Continental, Flying Spur, and Bentayga. The combination of fine craftsmanship, using skills that have been handed down through generations, alongside engineering expertise and cutting-edge technology is unique to UK luxury car brands such as Bentley. It is also an example of high-value British manufacturing at its best. Bentley employs around 4,000 people at Crewe.
